## RONDCOM Grande

## 3-in-1 form, contour and surface measurement with one setup

## RONDCOM Grande

- For large, precision components for the wind, power and bearing industries
- Precision rotary table on air bearings with 80 nanometer rotation accuracy
- Form tester, contour measuring instrument and roughness measuring system in one
- Time saver: components are automatically measured in one setting
- New, highly precise air bearings for extremely reliable results
- Contour measurements with a large deflection range of $\pm 26 \mathrm{~mm}$ at a resolution of 1.24 nanometers
- Roughness measurements with a large deflection range of $\pm 2 \mathrm{~mm}$ at a resolution of 0.62 nanometers

| Technical data summary | Form measurement |
| :--- | :--- |
| Measurable diameter | $1,650 \mathrm{~mm}$ |
| Max. workpiece diameter | $2,100 \mathrm{~mm}$ |
| Measuring height | 500 mm |
| Roundness error ${ }^{\mathbf{1}}$ | $0.08+0.001(50 \mathrm{~W} / \mathrm{U}$ filter $)$ |
| Z straightness | $0.15 \mu \mathrm{~m}(100 \mathrm{~mm})$ |
| Max. workpiece weight | 500 kg |

[^0]

Surface and contour measurements

| Measurable diameters | $150-1,700 \mathrm{~mm}$ |
| :--- | :--- |
| Max. workpiece diameter | $2,100 \mathrm{~mm}$ |
| Measuring range height | $40-540 \mathrm{~mm}$ |
| Roughness measuring range | $\pm 13 \mathrm{~mm}$ |
| Roughness resolution | 0.62 nm |
| Contour measuring range | $\pm 26 \mathrm{~mm}$ |
| Contour resolution | 1.24 nm |
